Senior DTC Video Editor | Performance Creative | Creative Producer | AI Video

Senior DTC video editor and performance creative with over six years of experience producing direct response and brand video across **multiple nine figure businesses and industries**. I remain a hands on editor, typically delivering **2 to 3 paid social ads or iterations daily** while also leading creative across **20 to 50 person creative teams**. My core craft is editing: pacing, motion, typography, sound, compositing, visual storytelling, and conversion focused execution across **Premiere Pro, After Effects, and DaVinci Resolve**.

Beyond execution, I work across the full performance creative process. I research winning ads, build briefs and shot lists, write and test scripts, develop hooks and angles, and use **ROAS, CPA, CPM, CPC, CTR, hook rate, and hold rate** to understand what is working. I work closely with media buyers and strategists to **double down on proven winners**, build high volume variation systems, and retire weak ideas quickly. **AI is a major part of my production stack**, including avatars, generative video and B roll, voice, image generation, lip sync, continuity, and rapid concept prototyping.

Technical Skills

- **Creative Leadership and Production:** Leadership across 20 to 50 person creative teams, editor briefing, review and QC, production planning, daily and weekly delivery cadence, onboarding, prioritization, feedback loops, and collaboration with media buyers and strategists.
- **Video Editing and Motion:** Adobe Premiere Pro, After Effects, DaVinci Resolve, CapCut, motion graphics, typography, pacing, sound design, visual effects, and conversion focused storytelling.
- **AI Video and Image Production:** Advanced AI creative production across ChatGPT, Higgsfield, Kling 3.0 , Google Veo, Runway, HeyGen , ElevenLabs, Flow, Seedance3.0 , Midjourney, Nano Banana, AI avatars, generative video, image generation, synthetic voice, lip sync, character continuity, scene continuity, and rapid concept prototyping.
- **Performance Creative and Analytics:** Meta Ads Manager, creative testing frameworks, A/B testing, hook rate, hold rate, thumbstop rate, CTR, CPM, CPC, CPA, CAC, ROAS, frequency, creative fatigue, winner iteration, and performance led decision making.
- **Creative Strategy and Direction:** Creative research, competitor analysis, brief development, script writing and testing, shot lists, hook and angle development, offer framing, persona development, concept iteration, and ad to landing page message alignment.

Professional Experience

Senior Video Editor

Ancient Remedies · Full time · UK · Remote | July 2026 to Present

At Ancient Remedies, a nine figure health and wellness DTC business, I work as a senior hands on editor and creative operator across a large performance creative team. I personally edit and refine priority ads while helping lead creative execution across a 20 to 50 person team, spanning quality, research, testing, AI production, and delivery.

- **Edit and finish priority paid social creative**, including UGC, testimonials, VSLs, product demos, founder style ads, AI led ads, and high iteration direct response concepts, with close attention to pacing, motion, typography, sound, compositing, retention, and conversion.
- **Review and guide creative output across a 20 to 50 person team**, giving specific execution feedback on hooks, structure, visual storytelling, B roll, product moments, pacing, CTA, and final polish before assets reach the media buying team.
- Plan daily and weekly creative output from brief through delivery, balancing fresh concepts with variations of proven winners so the buying team has a consistent pipeline of creative to test.
- Research winning ads, competitor patterns, hooks, formats, offers, avatars, and messaging, then translate the strongest findings into actionable briefs, shot lists, scripts, references, and visual direction.
- Review weekly performance with strategists, growth, and media buyers, using hook rate, hold rate, CTR, CPC, CPM, CPA, ROAS, spend, and creative fatigue to decide what should scale, iterate, refresh, or retire.
- Build and improve AI production workflows for avatars, generative B roll, voice, image generation, lip sync, continuity, and rapid prototyping, comparing tools by realism, consistency, speed, and production value.
- Audit production bottlenecks across approvals, briefing, asset flow, review, and QC, then improve the systems that help editors move faster with fewer avoidable revisions.

Execution Editor and Creative Strategist

Yamu Media · Performance creative agency · US · Remote | May 2026 to Present

At Yamu Media, I work as a **high volume execution editor** across performance accounts for large DTC and B2B brands, typically delivering **2 to 3 finished ads or iterations per day**. The role is execution heavy: taking briefs, scripts, raw assets, references, and proven winners and turning them into test ready creative at speed, while using performance data and AI production to improve each next iteration.

- **Edit and finish 2 to 3 paid social ads or iterations daily** across multiple accounts, handling hook construction, pacing, opening frames, B roll, typography, sound, product moments, CTA, and platform specific delivery from rough concept to final export.

- **Build high volume iteration sets from proven winners**, testing new hooks, first frames, pacing, structure, length, visual treatment, voiceover, CTA, and format while protecting the core selling mechanism that made the original perform.
- **Execute across multiple direct response formats**, including UGC ads, testimonials, VSLs, founder style creative, product demos, montage ads, problem and solution formats, and AI talking heads, adapting each edit to the audience, placement, and testing objective.
- **Use performance data to guide the next edit**, reading ROAS, CPA, CPM, CPC, CTR, hook rate, hold rate, spend, and creative fatigue to decide what to double down on, what needs a stronger opening or structural change, and what should be retired.
- **Produce AI led ads end to end** using avatar talking heads, generative video and B roll, image generation, synthetic voice, lip sync, and continuity workflows, then finish the work through conventional editing, motion, sound, and final polish.
- **Work directly with media buyers and strategists** on testing plans, competitor research, script changes, and winner expansion, feeding editing learnings back into the next batch of hooks, angles, briefs, and creative iterations.

Performance Video Editor (Paid Social, DTC)

Maple Media · Full time · Remote | 2025 to May 2026

At Maple Media, I focus on creating high converting direct response video ads for DTC brands, working at the intersection of creative production and performance marketing. My role is centered on producing, testing, and iterating paid social creatives that are built to capture attention quickly and drive measurable results across platforms like Meta.

- I produce 2 to 3 high converting ad creatives daily, including multiple variations of a single concept to support structured A B testing and rapid iteration cycles.
- I collaborate closely with media buyers and creative strategists to align edits with campaign objectives, audience targeting, and overall growth strategy.
- I work across multiple creative formats including UGC style ads, testimonials, product demos, founder led content, and fast paced montage creatives tailored for paid acquisition.
- I analyze creative performance using Meta Ads Manager and internal reporting tools, focusing on metrics such as hook rate, hold rate, click through rate, and conversion rate to guide editing decisions.
- I iterate on underperforming creatives by restructuring openings, testing new hooks, refining messaging, adjusting pacing, and improving visual storytelling to increase retention and engagement.
- I leverage AI tools to enhance production speed and output, including AI assisted ideation, hook generation, auto captioning, voiceovers, and content repurposing workflows.

AI Video Editor, Performance and DTC

ReadyChatAI · Full time · Remote | 2025, Contract

Created AI powered performance content that translated product ideas into clear social creative while combining traditional editing, motion design, generative video, avatars, and rapid testing workflows.

- Produced short form ads with Sora, Google Veo, Higgsfield, Runway, Nano Banana, and other generative tools, then finished the work through conventional editing and post production.
- Worked with growth teams to turn product concepts into testable creative assets, refining hooks, messaging, visual direction, and consistency against performance goals.

Freelance Video Editor and Creative Producer

Remote and Hybrid | 2020 to Present

Worked with brands, agencies, startups, and creators across Africa, the United States, and Europe, managing projects from concept through final delivery across paid social, commercials, branded content, and long form production.

- **Led the full video process** across scripting, shoot direction, editing, motion, sound, post production, and delivery, often operating as both editor and producer.
- Designed and produced direct response creative tests for Meta and TikTok, iterating hooks, angles, format, structure, and pacing to improve retention and response.
- Managed a small bench of freelance editors across hiring, onboarding, briefing, agreements, review, and quality control, building practical experience in creative team operations and accountability.
- Delivered short form paid social, long form YouTube, commercials, documentary, and branded storytelling using Premiere Pro, After Effects, DaVinci Resolve, and AI production tools.

Creative Video and Animation Specialist

TeeSas · Full time · Remote | Contract

Produced storyboards, animation, motion driven lessons, and edited educational content with After Effects, Premiere Pro, and DaVinci Resolve, using AI tools to speed production while collaborating with curriculum and content teams.

Video Editing Intern

CrispTV Media · Internship · Hybrid | 2020 to 2022

Supported senior editors across branded, entertainment, and commercial work, handling rough cuts, motion graphics, color, audio sync, sequence preparation, client feedback cycles, and broadcast deadlines.

Selected Additional Experience

- **AI Video Consultant:** Paid expert consultant on AI video generation tools through a global expert network, advising investors and researchers on model capability, cost, and real production workflows.
